

Digital Infrastructure Investment Summit
Airport Club Frankfurt, 12 March 2018

Roundtable: Infrastructure Asset Management Standard & Education

Roundtable Host: Dr. Franziska Hasselmann (CAS MIA)

Time: 12:00 - 13:30

Room: Zürich

CAS MIA
Certificate of Advanced Studies
**MANAGING
INFRASTRUCTURE
ASSETS**

Established in 2012, CAS MIA stands for building an internationally accredited infrastructure asset management profession (16 ECTS). The nine-month executive education is delivered with MBA level concepts and current literature at industry, corporate, organizational, and project level supported by changing university hosts, software partner, publishers, investors, all related industries, and infrastructure management organizations.

Dr. Franziska Hasselmann is Director of Studies at CAS MIA, academic advisor at World Economic Forum for the global infrastructure initiative, member of the editorial board of the Journal of Managing Infrastructure Assets, and reviewer for Academy of Management.

Roundtable content:

Infrastructure is a standardized asset class. Industry health is low. Among the reasons are missing competences. Since 2014 infrastructure asset management is highly regulated in terms of evidence based & integrated management systems. The roundtable introduces:

- the integrated infrastructure asset management standard
- the respective education & executive education landscape

The roundtable is of relevance for all organizations looking for compliance when interacting with the formal infrastructure asset management industry.
