

Roundtable: What kind of risks can occur in building fiber optic networks and how can we minimize them!
Roundtable Host: netzkontor nord gmbh

Time: **11.45 - 12.45**

Room: **Wien**

Dirk Müller is Co-founder and executive Director of netzkontor nord / OpenXS and Co-CEO of the Netzkontor Group. Dirk Müller has held senior positions in the telecommunications industry for over 20 years.

Profile netzkontor nord

netzkontor nord is one of the leading planning and consulting companies in Germany in the broadband network expansion.

netzkontor nord carries out the planning of fiber optic connections for many cities, municipalities and villages. Over 100,000 households have already been expanded with fiber optic technology.

The development of software such as the Network Rollout Management Solution (DiPS) or the Open Access Business Manager (OABM) complements the extensive range of services offered by netzkontor nord.

Among other things, OpenXS offers network operation and an OpenAccess platform.

Over 130 employees ensure the successful and sustainable implementation and operation of nationwide fiber optic projects.

Objective:

The workshop will discuss the project risks and the possibilities of minimizing them. E.g. risks in network expansion or in operations.

Format:

- Interactive workshop with max. 15 participants
- 1h session (without a break)
- Presentations only support the workshop discussion. The major focus is the active participation and integration of the participants.
- Chatham House rules apply for every Di² Summit Workshop and secure the high-level trustful environment

Content of the Roundtable:

1. What kind of risks can occur in broadband network expansion and operations?
2. What are mitigation strategies?
